Reasons for Allowance

1) The following is an examiner's statement of reasons for allowance, which supplements applicant's arguments filed 11-22-05:

As to <u>claim 7</u>, the prior art of record fails to *motivate* one of ordinary skill in the art to dispose a solid ring of **hot melt** adhesive within **the annular gap** as set forth in lines 11-13 of claim 7 in a tubular coupling element wherein the outer tube is concentric to the inner tube, a length of the front end of the inner tube is longer than a length of the front end of the outer tube and the annular gap is defined as set forth on lines 8-10 of claim 7.

As to <u>claim 8</u>, the prior art of record fails to suggest <u>the combination of</u> (1) the inner tube having a longer front end <u>and</u> (2) the linear connecting wall and the one cylindrically shaped annular gap <u>and</u> (3) a solid ring of hot melt adhesive positioned against the connecting wall <u>and</u> (4) the adhesive filling approximately one-half a depth of the annular gap along with the remaining limitations of claim 8.

As to <u>claims 12 and 13</u>, the prior art of record fails to suggest <u>the combination of</u>
(1) the axially parallel grooves <u>and</u> (2) the linear connecting wall and the one
cylindrically shaped annular gap <u>and</u> (3) a solid ring of hot melt adhesive positioned
against the connecting wall <u>and</u> (4) the adhesive filling approximately one-half a depth
of the annular gap along with the remaining limitations of either claim 12 or claim 13.

As to <u>claims 14 and 18</u>, the prior art of record fail to suggest <u>the combination of</u>

(1) pressing the solid ring of hot melt adhesive in the annular gap against the

Art Unit: 1733

connecting wall <u>and</u> (2) the solid ring of adhesive filling about one-half the annular gap along with the remaining limitations of either claim 14 or claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven D. Maki whose telephone number is (571) 272-1221. The examiner can normally be reached on Mon. - Fri. 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Crispino can be reached on (571) 272-1226. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
